2:05:29 AM - Now

KW007 C3 KW007 RSSI changed to 142.0
2:05:24 AM - 5 seconds ago

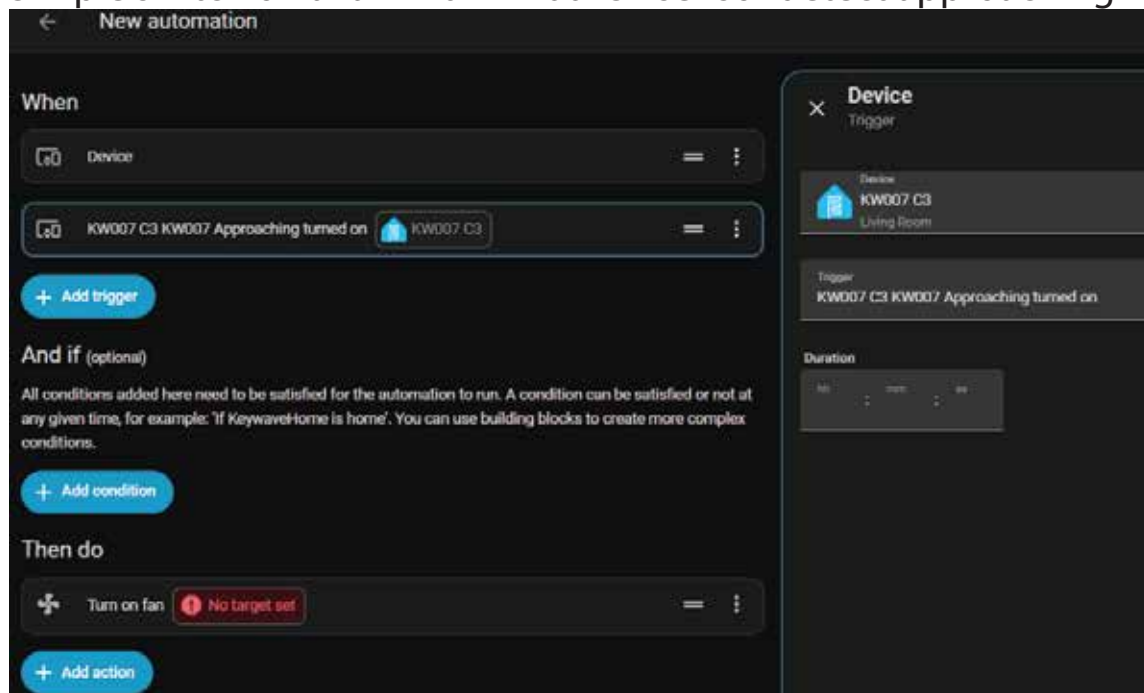

KW007 C3 KW007 RSSI changed to 105.0
2:05:19 AM - 10 seconds ago

KW007 C3 KW007 RSSI changed to 58.0
2:05:14 AM - 15 seconds ago

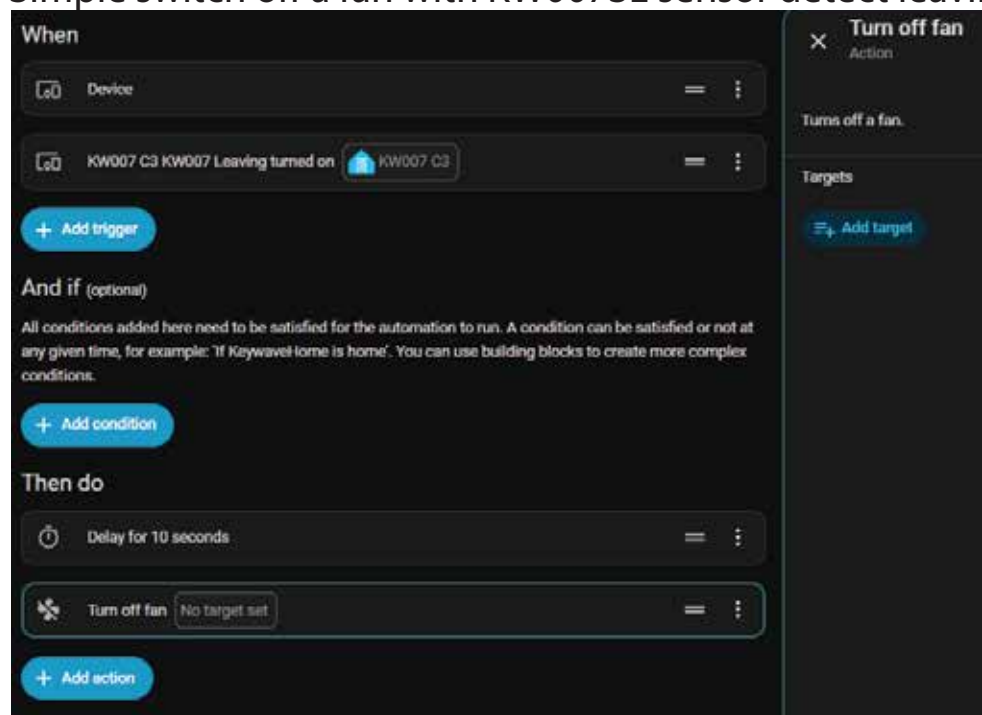

KW007 C3 KW007 Direction changed to
None
2:05:14 AM - 16 seconds ago

KW007 C3 KW007 Approaching turned off
2:05:14 AM - 16 seconds ago

Simple switch on a fan with KW007SE sensor detect approaching

Simple switch off a fan with KW007SE sensor detect leaving

But in the real world application, you should consider this, to prevent on/off too fast:

Trigger 1:
KW007 Approaching turned ON

Trigger 2:
KW007 Leaving turned ON

detect Leaving
→ starts 10 s countdown

after 4 s:
Approaching happens
→ automation restarts
→ old 10 s countdown is cancelled
→ fan turns ON
